Detailed Action

1.

Rejection Under Sect. 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

the claimed invention lacks patentable utility. The utility of the method is not set forth in the claim.

The claimed invention, according to claims 32-43 and 58, lacks patentable utility. It describes a method but it is not clear what the method steps will function to achieve or perform.

2.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3.

Claims 57 and 58 are rejected under 35 U.S.C. 102(e) as being anticipated by Kumpf.

With respect to claim 57, Kumpf teaches an imaging system as shown by figure 1, comprising: a component configured to generate a scanned image preview (via the preview button on the client scanner interface according to col. 7, lines 1-5). Kumpf teaches image data corresponding to an image, the scanned image preview representing the image in electronic form (image file directory according to col. 8, lines 48-54 and 62-66); an image region section control (user interface) configured for manipulation to select an image region (col. 7, lines 15-17) of the scanned image preview (col. 7, lines 18-20); the component further configured to emulate a final scan of the image region to generate a final scanned image, see col. 7, lines 14-22) and an

image region definition control configured for manipulation to define a classification of the image region, the parameters including paper size, image type, resolution, color or grey-scale, according to col. 5, liens 47-53.

With respect to claim 58, Kumpf teaches an imaging method, which is performed by the apparatus of figure 1, comprising the steps of : generating a scanned image preview (via the preview button on the client scanner interface according to col. 7, lines 1-5). Kumpf teaches image data corresponding to an image, the scanned image preview representing the image in an electronic form (image file directory according to col. 8, lines 48-54 and 62-66; defining an image region by means of image region section control through the user interface for manipulating to select an image region, see col. 7, lines 15-17; and emulating the final scan of the image region to generated a final scanned image (see col. 7, lines 14-22).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
